Make way for Tuzla Brain Week!

The Brain Week, with the emphasis on neuroscience and neurological diseases which have unfortunately become common, is marked in the period from 13 March to 19 March all around the world. Various activities of the project “Tuzla Brain Week” will be a way of marking this year’s Brain Week in Tuzla, with the theme “Brain and Genetics”.

Tuzla Brain Week (TBW) is a project of the Student Association of the Faculty of Medicine at the University of Tuzla “MEDICUS” which has been present for several years and which is implemented in cooperation with the Faculty of Medicine and the University in Tuzla for the fourth consecutive time.

During the Brain Week, workshops will be organized and the teams will be sent to kindergartens, elementary schools, secondary schools, faculties, retirement centers, special institutions, and so on, which will make possible that all age groups are included as participants in this project.

The main aim of this project is introducing people to neuroscience in a specially created manner which will be adjusted and comprehensive for all the participants.

Aside the workshops, a significant part of this year's project are the activities such as plenary lectures with foreign lecturers, a round-table meeting at the University Clinic Centre Tuzla with international participation, promotion and application of biomedical engineering, scientific research symposiums and the traditional “Science cafe”, based on the principle of informal lectures. Participants in the project will be professors and students of the Faculties of medicine and the Universities from Sarajevo, Mostar, Banja Luka, Zagreb, Rijeka, Osijek, Novi Sad, Belgrade, and Podgorica, which will give an international dimension to this project. Momentarily, about hundred participants are actively involved in the project.

This year, as well as the previous years, the biggest support is our general sponsor on the project – “DANA” foundation, which is also the original founder of this initiative, as well as the Federation of European Neuroscience Societies. Alongside the mentioned institutions, the partners on the project are the Government of Tuzla Canton, University Clinic Centre Tuzla, City of Tuzla, Tuzla Canton Medical Chamber, Healthcare Centre Tuzla, and many other partners and media sponsors of the project.

We wish to use this opportunity to invite those that are interested in joining us at the formal ceremony on 13 March 2017 at the Faculty of Medicine in Tuzla at 16:00h. We are expecting you!
