An evening at the Berlin Museum of Medical History
The German Contribution to the History of Neuroscience

8th July 2018 7-10.30 pm

@ Berlin Museum of Medical History at the Charité (Charitéplatz 1, 10117 Berlin)

The seminar will focus on Germany’s important contribution to neuroscience in the 19th and 20th centuries. Particular emphasis will be placed on the emergence of neurophysiology and biophysics, and on how exchanges between scientists from Germany and the rest of Europe contributed to progress in these fields.

Programme

7.00 – 7.15 pm: Registration and welcome drink

7.15 – 7.20 pm: Introduction by Lorenzo Lorusso (A.S.S.T.-Lecco, Merate, Italy)
Chair of the FENS History Committee

7.20 – 7.30 pm: Richard Brown (Dalhousie University, NS, Canada)
A brain museum tour of Europe

7.30 – 7.50 pm: Helmut Kettenmann (Max Delbrück Center for Molecular Medicine, Germany)
The development of the cell theory and the impact on neuroscience

7.50 – 8.10 pm: Richard Brown (Dalhousie University, NS, Canada)
European collaborations of Sir Charles Sherrington

8.10 - 8.35 pm: Axel Karenberg (Institute for the History of Medicine and Medical Ethics, University Hospital Cologne, Germany)
Areas of Knowledge and Issues of Power: 175 Years of German Neurology

8.40 - 10.30 pm: Standing Buffet and Tours of the museum

9.00 pm: 1st Tour of the museum

9.30 pm: 2nd Tour of the museum

organised by the FENS History Committee for the FENS Forum 2018
