

# Meetings

---

One of the key pillars of FENS is the organisation of meetings, which provide a wide range of learning, networking and professional development opportunities for our members.

At FENS meetings, the neuroscience community can learn about current topics in their field of interest, build networks with peers from basic, translational or clinical neuroscience research, share best practices with colleagues from around the world, and network with top international figures in neuroscience.

Societies

## ⊕ The FENS Forum

The FENS Forum of Neuroscience is the largest international neuroscience meeting in Europe. It covers all fields of neuroscience research and comprises a range of symposia, technical workshops, plenary lectures and poster sessions as well as a number of social events. It is organised biannually by FENS in collaboration with one of the FENS member societies.

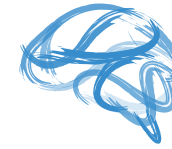

## ⊕ FENS Regional Meeting (FRM)

FENS Regional Meetings are national or regional scientific meetings organised by FENS member societies with support from FENS. FRMs are held biannually.

## ⊕ The Brain Conferences

The Brain Conferences are small-scale, high-level meetings bringing together outstanding researchers in key areas of contemporary neuroscience. They provide a unique forum for discussion and interaction at the forefront of current knowledge on specialised topics. Two conferences per year are organised by FENS in collaboration with the Lundbeck Foundation, the awardee of The Brain Prize.
