

One of the key pillars of FENS is the organisation of meetings, which provide a wide range of learning, networking and professional development opportunities for our members.

At FENS meetings, the neuroscience community can learn about current topics in their field of interest, build networks with peers from basic, translational or clinical neuroscience research, share best practices with colleagues from around the world, and network with top international figures in neuroscience.

Meetings

FENS | Federation of
European
Neuroscience
Societies

🕒 The FENS Forum

The FENS Forum of Neuroscience is the largest international neuroscience meeting in Europe. It aims to cover all fields of neuroscience research and comprises a range of symposia, technical workshops, plenary lectures and poster sessions as well as a number of social events. It is organised by FENS biennially every even year in collaboration with one of the FENS member societies. The Forum represents a unique opportunity for neuroscientists from around the world to gather together and enjoy excellent science in one of Europe's most vibrant cities.

🕒 FENS Regional Meeting (FRM)

The FENS Regional Meeting (FRM) is dedicated to supporting member societies in promoting excellence in research, with a European regional focus. FRMs aim to strengthen neuroscience in all European countries, promote scientific exchange within and across European regions and secure representation and access to the FRM programme for underrepresented scientists and topics.

🕒 The Brain Conferences

The Brain Conferences are small-scale, high-level meetings bringing together outstanding researchers in key areas of contemporary neuroscience. They provide a unique forum for discussion and interaction at the forefront of current knowledge on specialised topics. Two conferences per year are organised by FENS in collaboration with the Lundbeck Foundation, the awarder of The Brain Prize.

fens.org/2024 | #FENS2024

The next edition of the FENS Forum will be hosted by the Austrian Neuroscience Association and co-hosted by the Hungarian Neuroscience Society. It will take place in Vienna, Austria, from 25-29 June 2024.
